ABSTRACT

A tungsten sealing glass for use in a fluorescent lamp has a composition of, by mass percent, 65-76 % SiO₂, 10-25 % B₂O₃, 2-6 % Al₂O₃, 0.5-5.8 % MgO + CaO + SrO + BaO + ZnO, 3-8 % Li₂O + Na₂O + K₂O, 0.01-4 % Fe₂O₃ + CeO₂, 0-10 % TiO₂ + Sb₂O₃ + PbO, and 0-2 % ZrO₂, where Na₂O/(Na₂O + K₂O) \leq 0.6.
